

SMIT TEXTILE WELCOMES CUSTOMERS AT VIETNAM TEXTILE & GARMENT EXPO 2007

SMIT TEXTILE will be attending Vietnam Textile & Garment Expo 2007, to be held in Hanoi next April 17th - 19th , in co-operation with its Sales Representative Diethelm & Co. Ltd Technology and with the support of both ICE (Italian Trade Commission) and ACIMIT (Association of Italian Textile Machinery Manufacturers).

Vietnam Textile & Garment Expo 2007, which has come this year to its 17th edition, represents an important event for textile machinery in an fast growing market like Vietnam, where textile products represent a preeminent export sector which is forecasted to expand significantly in the next years.

The accession to WTO also creates conditions for Vietnamese enterprises to invest in advanced technology, to integrate all manufacturing processes, focussing on the high-end market segments.

SMIT TEXTILE's leading technology is the most appropriate to satisfy these needs: efficiency and versatility of machines meet the specific customers' requisites, ensuring productivity and competitiveness over time.

Productivity and versatility optimally combined by SMIT TEXTILE products

The modularity concept that distinguishes the SMIT TEXTILE's product development strategy creates a variety of weaving machines getting both the advantages of specialisation and high production yield.

The GS900 gripper weaving machine is designed to optimize the versatility and productivity features thanks to the guideless «dynamically controlled» flexible rapier technology in which SMIT TEXTILE holds undisputed leadership. The new mechatronic solutions - like EWS, Electronic Weft Selector up to 12 colours, with continuous control on the weft; Lenomat, programmable control of independent selvages and leno; EWC, electronic self-adapting weft cutter and the "Direct Main Drive", designed to achieve optimum acceleration and deceleration ramps – ensure highest weaving performances, quick set-up and supreme fabric quality.

The GS900F terry version is distinguished by "Dynamic Pile", the SMIT TEXTILE system of pile formation by rocking sley motion that ensures freely programmable pile height and ratio, to create unique relief patterns and waveforms for the finest and most sophisticated terry production.

Rapier weaving machine GS900T for technical and speciality fabrics allows to achieve best quality and top performance in many sectors of technical fabrics: glass fabrics, high-precision printing and bolting cloths, aramid fabrics, airbag, industrial and heavy fabrics.

The JS900 air-jet weaving machine, based on the same modular architecture, comes from the experience and broad know-how in air-jet insertion technology held by SMIT TEXTILE. The JS900 air-jet machine meets the most demanding requirements in terms of productivity, absolute operating reliability, top fabric quality.

SMIT provides an extensive range of customer pre-and after-sales support services which, together with original spare parts and software up-dates availability, make SMIT TEXTILE an ideal partner for successful investments.
